

Multi-carrier quoting platform with integrated ticket capabilities

ApplicInt is a technology company that provides intelligent web-based solutions for the insurance industry. Designed with the flexibility to complement a client's existing environment to create a system customized to meet the needs of an organization's management, sales and customer service department. These solutions have provided carriers, banks, brokers, paramed providers, call centers and TPA's with the ability to increase revenue while dramatically reducing the cost of processing life, health, LTC and disability applications.

ApplicInt Products

- **InsuranceComplete** - The insurance industry specific CRM proven to improve efficiency and profitability
- **ExpressComplete** - Multi-carrier quoting platform with integrated ticket capabilities
- **CallComplete** - Web-based call center solution that can be utilized within multiple call centers
- **ExamComplete** - The digital paramed platform that has consistently eliminated NIGOs

Selling insurance does not have to be complicated. Requirements and forms constantly change but ExpressComplete simplifies the form completion process through the use of a reflexive interview format. The interview identifies all product and state specific forms and question requirements. ExpressComplete provides agents with access to a web-based multi-carrier quote and ticket platform that can be used on smart phones, tablets and laptops.

The advancements in technology have resulted in both agents and consumers expecting more electronic options when applying for insurance. ExpressComplete supports the relationship between agents and consumers by providing a platform that allows agents to initiate the life insurance application process within 3-7 minutes.

- *The ExpressComplete features listed below provide agencies and agents with the tools proven to simplify the process of selling insurance*
- *Reflexive interview format assists agents and consumers in accurately completing insurance applications for any carrier and any product type*
- *Agents can use the health analyzer to confirm rate class*
- *Agents can send quotes to consumers and track their pending tickets*
- *Reminder notices are automatically sent to consumers if the agency does not receive the signed application package within the specified period of time.*
- *Can be used in the selling activities for agents marketing to groups as well as individuals*
- *Eliminates standard process expenses such as manual case management while increasing placement ratios through an enhanced consumer experience and automated workflow.*
